very cool game hope it goes MP. Wow. I was not sure how a game featuring sky pirates in ship-to-ship combat could possibly be bad. Now I know: because nobody is playing it to compete against and your cannonballs will pass harmlessly through enemy ships as they destroy you again and again. Awesome!. Good and funny adventure game from the 1990's. Combines animation and full motion video effects - in a positive way.

Pros:

- + Graphics
- + Acting
- + Voice acting
- + Music
- + Nostalgia

Cons:

- Some puzzles seemed to be too easy.
- Although sometimes didn't know for what some items were for.

[4/5]. very good game i like. Don't really like it. maybe it's too hard but i usually don't feel like it's my fault when i die.. **Head Shot: A game where grenades are over-powered... and you have 20 of them**

This game is terrible.

I am lucky to not have bought this but instead receive a key for this game free of charge.

There is plenty of things wrong with this game (view models, hud, pause menu, layout, hackers, everything else)

At times it's so stupid it's not even fun

If you are, for some reason, considering to buy this game then please don't.

. Oh god yes!!!. Unless you want to cheat, then this game sucks. You get a pistol and like 20 bullets if you do a certain side mission. Then you get utterly destroyed trying to progress to the next area because it takes at least 187 bullets just to kill one of these jiggy thugs. I tried to get my money back, but I was incoherent for far too long after buying it and steme refused.. I bought this game a while ago, when it was on sale. Loved Worms 3D, so I thought it would be worth a try. And it was! The game is very similar to 3D, except for the customization options for your worms. Also the coin and store system has been integrated, there are even some weapons to buy for coins that you earn for mastering challenges. And the best thing: they included the Worms 3D story so even after you finished the normal story it won't get boring playing in single-player. Although I did not dare to try the competitive mode, I would recommend this game to everyone who played Worms 3D. But get it for sale!. Mountains of text to read, very little gaming and very boring. I'm quite disappointed with this one.

So what is it really?

A wargame, a parody, a board game, a computer game?

I've played computer war games since 1983 and never found one I fundamentally disliked as much as this game.

It fails to show respect to history, has no fog of war, and is not even funny.

Biggest waste of my recent gaming dollars.. It's unnecessary to play this game for a long time to write a review, because it's a straight-to-the-point game. So here is my review:

This game is most definitely something you could play while waiting for something like a download to finish, not really hype-inducing. Nevertheless, an entertaining little game (which is a little overpriced). Nothing negative about it. I couldn't recommend this, however, because it doesn't have any specific feature that would appeal to me, and most likely others.. The game has really bad dialog, too much pixel-hunting and random counter-intuitive puzzles. In other words, it's a typical example of the poorly done point-and-click games of the modern era. It's really too bad, because the premise and setting are interesting, and the pre-rendered graphics are actually very nice, but ultimately the story is boring and the game not worth playing.. I have loved this game since Floyd hit Eastern North Carolina (I know, odd relation but that's when I was introduced to it). I've been waiting and hoping they would release it for ps4 or at least make it compatible. But VOILA! Steam got it first and I couldn't be happier. Crystal Method will have you rocking out and the psychedelic tunnels will have you completely zoned into the game. Absolutely recommend!! If you are a fan of Chipzel's music buy the album and go buy audiosurf 1 or 2 and play it there you will have a way better time there. This game has the same concept as that racing game in the 200-in-1 game your grandmother buys you when you were 7 except somehow they screw with the controls. They feel extremely sluggish as if the same grandmother who bought you the 200-in-1 game was the driver of the car, most the time im holding the left or right arrow and the car barley turns either direction but gods forbid i let go and the car go right back to its original position faster than light. Now i am a fan of difficult games i played super hexagon, dark souls, demon souls, dank suits 2, all the touhou's and those have a learning curve and the deaths in those games dont feel half as cheap as the one's in this game and most of the time its because grandma wont turn the car fast enough.

So there if you find this game's concept enjoyable buy the 200-in-1 version and buy the sound track its a way better use of your money.. I play: Bezier, Echoes+, Geometry Wars, Gran Vitreous, P-3 Biotic, Scoregasm, Ultratron, Waves....

No, I don't like space-shooter-arena !!

But I assume this one is a good one.. this game honestly should be regarded as one of the greats, it has a great community behind it, the devs are committed and very wonderful people, and the game? oh god the game, this is not a game, **THIS IS ART IN PLAYABLE FORM!** i am so happy i discovered giant diamond back when it was just a tiny particle of carbon, the characters are likeable without saying a word, there is actually an ending to reach, **IT HAS MULTIPLAYER!** (subnautica take notes) despite having an ending the game never puts you on a strait path, you could make a rocket car out of a rover and a bunch of rocket thrusters, you could play football with some tractors and a cosmic marble, you could build a shrine to your lord and saviour (mine would be a can of diet coke) you could make an explosion so powerful that it would make a certain mad titan even madder, you can make friends, make cars, explore the cosmos, learn just how much you hate nature and so. much. more. the game is still updating and as of the time i'm writing this, we are getting jetpacks. seriously though, i'm ashamed of you. you spent all this time reading my reveiw **WHEN YOU COULD BE PLAYING THIS AMAZING GAME!**

8V10 if certain bugs were fixed it would be a 9V10. this is probably the funniest and generally the best game of its genre that I have ever played. great stuff :D. Very cool game.

The killing of the zombies is very satisfying, and you can kill them with almost anything you see.

The carnage and destruction of the office add to the chaos and fun.

It's a very entertaining game with a low price tag and a surprinsing amount of cool mechanics.

Totally worth the money

. As someone who occupies most of their time with studying ancient history, loves Ancient Egypt, and is also a language enthusiast who studied linguistics as well, this game was simply perfect for me. If you are even remotely interested in linguistics, history and archaeology, as well as liking adventure/exploration games with a heavy focus on the narrative and making choices, then this will be a great experience for you. I am calling it an experience more than a game, because for me it had less to do with playing any game mechanics and more with getting immersed in the world, the characters and its lore.

Basically Heaven's Vault invites you to grab a cup of coffee, put on your archaeology hat and then become part of a beautifully

crafted setting that heavily draws from the Ancient cultures of our Earth, mostly the natives\indigenous and of course Egyptian\African ancient history and culture.

Highly recommended for those people like me who are a bit tired of all the violent, drama heavy\focused entertainment out there and want to engage with more profound and beautiful ideas. Thank you, dev team, for creating this work of art. Please more of this :)
